MakeCode Arcade Games

The MakeCode Arcade editor is a full-featured coding platform for creating games using Blocks or JavaScript. The Games we're making today (or your own creations) can be played online or downloaded and played on a **Microsoft Arcade Console** or something similar to those seen on the right. Handheld devices produced by Microsoft hardware partners run at about 30 frames per second on the devices.

Click on the link below the picture to make that game

[Chase The Pizza](#)

[Happy Flower](#)

[Free Throw](#)

[Galga](#)

[Lemon Leak](#)

[Collect the Clovers](#)

[Maze](#)

Click on a game you want to try and, on the page that follows, click on this button

[Try this tutorial!](#)

Then work your way through the tutorials to make that game.
